PROFESSIONAL SUMMARY

Computer Science Engineering graduate with hands-on experience in full-stack software development, enterprise ERP workflows, and AI-integrated applications. Currently contributing to a live, multi-portal maritime procurement ERP platform — building features, running functional and regression testing, and debugging production issues. Independently built full-stack projects integrating the Google Gemini API for AI-driven workflows. Proficient in React, Python, Django, REST APIs, and SQL databases. Seeking a Software Developer role to apply full-stack development, testing, and AI-integration experience in a production environment.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

Frontend: React, Bootstrap, Tailwind CSS, Responsive Design

Backend: Django, Django REST Framework, REST API Design, FastAPI (basic)

Databases: MySQL, Oracle SQL, PL/SQL

Generative AI: Gemini API Integration, Prompt Engineering, AI-Assisted Development (Cursor)

Tools & Practices: Git, GitHub, JWT Authentication, Role-Based Access Control, WebSockets, Functional/Regression/UAT Testing, Debugging, Docker (basic)

EXPERIENCE

Software Developer Intern — Euroasiann Marine Spares Pvt Ltd

Hyderabad, Telangana · On-site · June 2026 – Present

- Contribute to feature development and UI enhancements on a live, React-based multi-portal maritime procurement ERP platform, collaborating with the development team through Git-based pull requests.
- Perform functional, regression, and end-to-end User Acceptance Testing across Vendor, Customer, Admin, Tech, and Port Agent portals, validating the full procurement lifecycle — RFQ, quotation negotiation, purchase orders, shipping, invoicing, and payments.
- Identified and documented 26+ functional, UI, and workflow issues during Vendor Portal testing, verifying resolutions through subsequent regression cycles.
- Validated WebSocket-based support chat and real-time notifications for reliability under live usage conditions.
- Contributed to Vendor Onboarding module enhancements (multi-step forms, document uploads, dynamic product fields, multi-warehouse support) through AI-assisted implementation, and gained practical exposure to Git branch synchronization, merge-conflict resolution, and deployment troubleshooting (Docker, GitHub Actions, Coolify).

AI & ML Intern — IBM SkillsBuild / AICTE

Remote · December 2025 – January 2026

- Completed a project-based AI/ML training program and independently built SmartFit AI, a Python/Streamlit application delivering personalized diet and workout recommendations using BMR calculations and nutrition-based filtering across 2,000+ food records.

Python Development Intern — Pinnacle Labs

Remote · September 2025 – October 2025

- Developed backend modules for e-commerce, calendar-reminder, and quiz-platform applications using Python and MySQL, applying REST API and data-processing practices with Pandas and NumPy.

PROJECTS

Centralized Curriculum Management System (CCMS) — React, Django REST Framework, PostgreSQL, Gemini API, JWT

Developed during a software internship at Synycs

GitHub: [AkhilRathod03/Centralized_Curriculum_Project_Synycs](#) · Live: [centralized-curriculum-project-syny.vercel.app](#)

- Independently designed and built a full-stack, multi-tenant academic management platform with role-based access control for Admin, Faculty, and Student users.
- Integrated the Gemini API for prompt-driven curriculum and content generation, reducing manual content-entry effort.
- Implemented JWT authentication, FullCalendar-based scheduling with conflict detection, and real-time analytics dashboards (Recharts); diagnosed and resolved multi-service deployment issues across Vercel, Render, and Supabase to ship the application within a two-week timeline.

SmartFit AI: Personalized Workout & Diet Planner — Python, Streamlit, Pandas, NumPy

GitHub: [AkhilRathod03/SmartFit-AI-Planner](#) · Live: [smartfit-ai-planner.streamlit.app](#)

- Built an AI-assisted fitness recommendation app that calculates BMR and filters food/workout recommendations from a cleaned nutrition dataset (2,000+ food records).

EDUCATION

B.Tech, Computer Science Engineering — Malla Reddy Institute of Technology, Hyderabad

2021 – 2025 | CGPA: 7.12 / 10

CERTIFICATIONS

OCI AI Foundations Associate (Oracle) · Artificial Intelligence & Machine Learning (IBM/Edunet) · Software Engineering Job Simulation (Accenture) · AI Upskilling Technical Foundation (Qualcomm) · Responsive Web Design (freeCodeCamp)
