## PROFILE

A versatile Python Developer & AI/ML Enthusiast with hands-on experience in designing, developing, and deploying end-to-end web applications. Proficient in frontend technologies like HTML, CSS, and JavaScript, and backend development using Python, and SQL databases. Eager to contribute to a dynamic team, building robust, scalable, and data-driven software solution.

## EDUCATION

### Computer Science Engineering

2021 – 2025

Malla Reddy Institute of Technology

Hyderabad, Telangana

## EXPERIENCE

### AI & ML Intern | IBM Skills Build

Dec 2025 – Jan 2026

- Developed Smart Fit AI, a full-stack web application using Python and Streamlit to deliver personalized health recommendations.
- Designed backend logic to process user inputs and execute a recommendation algorithm for personalized diet and workout plans.

### Python Development Intern | Pinnacle Labs

Sep 2025 – Oct 2025

- Built backend modules including an ecommerce platform, calendar reminder, and quiz app using Python and MySQL.
- Implemented business logic and data handling using Pandas, NumPy, and REST principles.
- Optimized database queries and application logic, reducing load time by approximately 30%.

### Web Development & Designing Intern | Oasis Info byte

Jul 2025 – Aug 2025

- Created a responsive landing page, a portfolio website, and a temperature converter application from scratch.
- Utilized HTML, CSS, and JavaScript to build accessible and mobile-responsive interfaces.
- Gained experience in UI/UX design, project structuring, and frontend problem-solving.

## PROJECTS

### Smart Fit AI: Personalized Workout & Diet Planner [link](#)

- Led the development of a data-driven full-stack fitness application using Python and Streamlit.
- Built backend logic to process user inputs and generate personalized diet and workout recommendations.
- Designed an interactive Streamlit dashboard for users to track their fitness progress in real-time

### Web Vulnerability Detection System [link](#)

- Developed an end-to-end security application to detect CSRF vulnerabilities in web applications.
- Engineered the backend using Python and Flask, integrating an ML model to analyze web traffic patterns.
- Built a simple frontend to interact with the system and display vulnerability scan results.

### Suspicious Human Activity Detection from Surveillance Videos [link](#)

- Developed a deep learning system using Python, TensorFlow, and OpenCV to detect abnormal human activity.
- Trained and evaluated the model on a labeled dataset, achieving 85% accuracy in real-time surveillance footage.
- Designed the system with potential for integration into live security monitoring dashboards.

## SKILLS

- **Languages:** Python, HTML5, CSS3, JavaScript
- **Software Engineering:** Software Development Life Cycle (SDLC), Version Control (Git)
- **Databases:** Oracle SQL, MySQL, PL/SQL
- **Tools & Technologies:** Git, GitHub, VS Code, Jupyter Notebook, Power BI, REST APIs
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Scikit-learn, Django, React, Streamlit, OpenCV
- **Concepts:** OOP, Data Structures, Design Patterns, Debugging, Agile Methodology.

## CERTIFICATIONS

- Artificial Intelligence Fundamentals - IBM
- Responsive Web Design - Free Code Camp
- AI Upskilling Technical Foundation - Qualcomm
- Software Engineering - Accenture
- OCI AI Foundations Association - Oracle
